

## Alternative Syntax for Symbols

The English descriptions show how an end user should describe. The inputs will be case insensitive. Italics denote variable values the user should enter.

\*: All

?: Any

-: From *lower\_bound\_value* to *upper\_bound\_value*

,: ,

/: Start at *initial\_value* increase by *increment*

L: Last

W: Weekday

#: *nth day\_of\_week* of the month
